Release 2.0 — planning overview

Projekt Ä › To Do · Due 2030-06-30 · Checklist 2/4
Created 1999-12-24 08:00 · Updated 1999-12-31 23:59 · Status 2000-01-01 00:00

label number 0 | label number 1 | label number 2

DESCRIPTION

Short, readable summary of the release plan with **bold**, *italic* and `inline code`.

This second paragraph is deliberately a little longer, so that it wraps over several lines and the spacing between consecutive paragraphs can be judged: the gap should be clearly visible, yet smaller than the one above a heading.

A third paragraph follows directly. It is here to show that prose reads evenly, and that line spacing inside a paragraph differs from the space between paragraphs.

Goals

The goals below are ordered by priority. This paragraph precedes a list, so the distance to the first bullet matters.

- Ship the new **export** pipeline
- Cut start-up time in half
  - measured on the reference laptop
  - reported in the release notes

1. Freeze
2. Test
3. Release

A paragraph directly after a list must not stick to its last item, and should not float away either.

> *Scope is fixed; dates are not.*

Prose after a quote, to judge the gap below it.

Footnotes[scope] sit at the bottom of the page of their reference.

> ⚠ **WARNING**
> The freeze date is firm.

Prose between two alerts and before the next block: it should neither touch the alert nor leave a gulf.

> 💡 **TIP**
> A multiline alert may hold several paragraphs.
>
> Like this one.

Text right below an alert, followed by a plain multiline quote.

> *A multiline quote spans several lines*
> *without a `>` on each of them.*

> *Even paragraphs.*

Timeline

The schedule has three phases. This paragraph introduces the table, so check the gap between the text and the table’s top rule.

Phase	Owner	Weeks
Design	Ada	2
Build	Grace	6
Verify	Linus	3

The paragraph after a table follows the bottom rule at a comfortable distance, and is itself long enough to wrap onto a second line.

[scope] Defined anywhere in the text; set small below a rule.

Responsibilities

A matrix labels its rows as well as its columns (empty top-left cell):

	Design	Build	Verify
Ada	owner	review	—
Grace	review	owner	support
Linus	—	support	owner

Closing prose after the matrix, before a heading and a code block.

Notes

Run the following to package a release:

```
cargo build --release
./scripts/package.sh
```

That is all — a last paragraph after the code block.

CHECKLIST

- [x] Freeze the feature list
- [x] Write the migration guide
- [ ] Run the load test
- [ ] Tag the release
